Why did you decide to go to University?

In order to prepare yourself for what comes next, the future. And the future is the real world.

At Universidad Europea, we focus on the **professional** that you want to be and on providing you with a **practical training** that enables you to work on your future from day one.

We call for your own **progress and development**, for you to go beyond, offering you the help you need but never forgetting that you are in the driving seat.

This makes Universidad Europea more than just a university. And you more than just a student.

Go beyond

Campus

Madrid. VILLAVICIOSA

STATE-OF-THE-ART FACILITIES AND RESOURCES IN AN OUTSTANDING ENVIRONMENT.

Have a unique university experience on our biggest campus. With 33% international students and facilities equipped with cutting-edge resources and technology.

Real Madrid.

REAL MADRID GRADUATE SCHOOL - UNIVERSIDAD EUROPEA.

Do you dream about working in a field that you're truly passionate about? Get your education at the only Postgraduate School specialized in sports. Don't just dream, get ready.

Madrid. ALCOBENDAS

BUSINESS AND UNIVERSITY GO HAND IN HAND.

A campus that brings you the reality of being a professional and helps you to get a job placement through agreements with companies.

The meeting point where new initiatives and the most curious minds find their space.

Valencia.

CAMPUS IN THE HEART OF VALENCIA.

We are the only private university with a **privileged location** in the city centre. We also have our own University Dental Clinic.

Canarias.

CAMPUS IN LA OROTAVA AND SANTA CRUZ.

An unbeatable environment where you can develop your skills to the full, facilitating employability and entrepreneurship.

Online.

UNIVERSIDAD EUROPEA ONLINE.

100 % online programs:

The flexibility you need. Get an education at your speed at the leading University in educational quality and innovation.

Internationally Recognized Quality

Be Global

We want you to imagine how it will be your future as a professional.

We inspire you in figures!

Universidad Europea's Certifications.

30% **♀**

International Students.

You'll live in a multicultural environment with an average above other universities.

300

Agreements.

You'll be able to study abroad at prestigious universities around the world.

14,000 🖆

Agreements with companies.

You will be put to the test on campus with challenges, projects and gamification. You will also do an internship to train as a global professional.

Bachelor's Degree in Physical Activity and Sports Sciences

Make your passion your profession maximize your potential!

If sport is your passion, consider adding vision, culture and values. We're waiting for you!

The world of sports is becoming one of the most important industries in Spain and, in general, throughout the world, creating more than 214,000 jobs in Spain alone.

Physical exercise helps to improve health and prevent non-communicable diseases. You have a world full of possibilities at your fingertips.

Specific and differentiated training. Success guaranteed

In response to new demand, the Universidad Europea accepts the challenge of training future sports professionals, teaching them to be able to make the most of, and even create for themselves, new opportunities in

the field of training and physical activity, health, sports management and teaching. From day one, we will teach you how to use and apply the most advanced technology used in this sector.

What sets us apart?

Bachelor's Degree in Physical Activity and Sports Sciences

Highly recognized

Our Faculty of Physical Activity and Sports Sciences is #1 among Spanish private universities, and is within the top 150 in the world, according to the Shanghai Ranking 2021. We are a top University when it comes to conducting research on Physical Activity and Sports applied to health, according to the I-URG Ranking of Spanish Universities. The newspaper El Mundo also recognizes us in its annual ranking as the best private center to study this Degree. We offer the only Degree in Spain that is internationally accredited by the European Health & Fitness Association. This enables our students to broaden their employment possibilities in Europe even further.

Unique curriculum

You will specialize in the Sports Training area, focused on Basketball and Soccer, and add on nine elective modules (swimming and water activities, golf, outdoor activities, etc.) Expand your resume by:

- Becoming a Certified Personal Trainer (CTP) and Certified Strength and Conditioning Specialist (CSCS) from the prestigious international body NSCA.
- Achieving Sports Technician qualifications in a variety of sports, thanks to our University's **UFEDEMA Sports Technicians Training Center.**

You can take the **Degree in Physical Activity and Sports Sciences + Advanced Football Technician** through the UFEDEMA Sports Technician Training Centre located at the University, to become a football coach in any or a physical trainer, among many other professional opportunities. This diploma is taught in Spanish.

Cutting-edge facilities

We train our students in laboratories specially designed for studying exercise physiology, biomechanics, sports technique training and analysis, physiotherapy, biology and anatomy. We also provide access to a Simulated Hospital and 30,000 square meters of firstclass sports facilities, including an indoor and outdoor pool, tennis and paddle tennis courts, a soccer field, a sports hall with basketball courts, an athletics track, a beach volleyball court, as well as in the "Human Performance Research Lab (HPRLab)", a state-of-the-art area for cross-disciplinary learning. It is the perfect link between teachers, students and the sports industry.

What sets us apart?

Bachelor's Degree in Physical Activity and Sports Sciences

Recently, we also opened one of the most modern and advanced sports complexes you can find on university campuses in Spain. This complex is packed with the most cutting-edge technological innovations and impressive equipment, with a high value placed on the biomechanics of our sports equipment.

We offer equipment designed by Cybex and Hammer Strength, the world leader in strength equipment, which is also par excellence the brand of elite athletes and the most prestigious universities in the United States. We often hold our classes in the scientific laboratories and our new, innovative and functional "Hammer Strength" training room, a space that is totally unique in Spain where our students can put into practice all the knowledge they have learned.

International experience

In prestigious universities in the United Kingdom, USA, Canada, France, Portugal, Australia and Italy, among many other countries.

Quality Work Experience

From day one, and with prestigious companies and institutions: The High Council for Sports, Spanish Olympic Committee, Association of Spanish Footballers, clubs of the main sports federations, Go Fit and Sanitas.

Thanks to our collaboration with the Real Madrid Foundation and the Real Madrid University School, our students can take part in international projects and attend exclusive conferences led by top sports professionals.

Global Sport Management Degree

A growing sector

If sport has more relevance every day and is attracting the interest of more and more people all over the world, have you ever wondered how to develop your business vision in a company within the sports industry?

On a global level, the Sports Management industry generates around \$700 billion every year – around 1% of the world's GDP. This industry offers enormous employment possibilities both in Europe and the United States.

Look at the economic impact of key sporting events such as the Madrid Mutua Tennis Open or the Longines Global Champion Tour... Analyze a sports sponsorship deal and its return.

The self-taught sports professional no longer exists

At Universidad Europea, our students are doers. Studying this degree, we want you to have the profile that managers in the sports industry are looking for: a high-quality university education, a broad business vision, versatility and an international vision.

Receive a multidisciplinary education in which we are pioneers and where the development of sports practice and physical activity coexist. Get a deep understanding of sport facility management via projects within fitness centers, golf courses or large sporting events.

What sets us apart?

Global Sport Management Degree

Highly recommended

Our Faculty of Physical Activity and Sports Sciences is #1 among Spanish private universities, and is within the top 150 in the world, according to the Shanghai Ranking 2021. We are a top University when it comes to conducting research on Physical Activity and Sports applied to health, according to the I-URG Ranking of Spanish Universities.

Hatest technology

You'll have access to the latest technology allowing you to make key decisions based on reliable information. You'll also be able to benefit from the most advanced software for simulating projects related to economic impact analysis.

On the front line in Sports Management

Get to the top of the queue and gain the management skills needed to succeed within any organization in the sports sector. Your studies will focus on the skills demanded by the sports industry and you'll also study modules on sports practice and physical activity.

In addition, you will be in contact with professionals, and have access to content and events at the Escuela Universitaria Real Madrid - Universidad Europea which runs some of the best sport postgraduate courses in the world.

Escuela Universitaria

In touch with professional world with strategic partners

Internships at some of the biggest sporting institutions in Spain such as the Spanish Olympic Committee, the Sports Council, Mutua Madrid Open, the Spanish Tennis Federation, Holmes Place, Sanitas or the AFE (Association of Spanish Footballers).

We have agreements with football clubs, large fitness chains such as Go fit, sports or activity tourism companies and public administrations. In addition, from the first year you are connected to the professionals in the sports sector as a member of the Council of Sports Managers of Madrid.

What sets us apart?

Global Sport Management Degree

100% international experience

Your rigorous program will be:

1st year > Corporate sports experience in Madrid: A great chance to get new insights and expertise in the field of Sport Management and assist in talks and presentations given by internacional experts.

2nd year > 5 day immersive experience inside the sports industry, in a Spanish city (visits to sports facilities, clubs, sport events, etc.) allowing you to see first-hand the management of various types of events.

3rd year > 5 day corporate trip to New York within the sports industry (visits to sport facilities, clubs, sport events, NBA, MLS, NHL, etc.) allowing you to see firsthand the management of various types of events.

The University reserves the right to make changes in the destination city in order for the student to obtain the best experience available.**

4th year > A year-long international experience including an interrnship. You will enjoy a stay in a top university in the United States, and you'll be connected to the professional world from day one.**

You can also benefit from international agreements with top universities in the world of sport management such as Victoria University (Australia), University of California Irvine, Western Carolina University and University of Cincinnati (United States); Bishop's University (Canada), Kendal College, Kent State University (USA) or Cardiff Metropolitan University (United Kingdom), etc.

Bachelor's Degree in Dentistry

Differential Ratios

Do you want to take care of smiles?

Dentistry is advancing by leaps and bounds. Scientific and technological advances are transforming this profession. Professionals in this field have to be prepared to meet expectations and needs that society is going to demand and we will show you how.

That is why the Universidad Europea is committed to training based on new teaching methodologies and by the application of the latest technologies, experimenting sensations almost identical to those you will have in a real patient or in our simulated environments where you prepare to act in any situation or emergency unexpected.

Knowledge, innovation and clinical practice

In their clinical preparation, students are trained in the latest trends and techniques in the dental field, use the most advanced technological resources and with the support of teachers with a great clinical experience, perform the diagnosis and comprehensive treatment of their patients, thus offering them the highest quality of care.

Pioneer evaluation system

Gain self-confidence and ensure that you have achieved the learning objectives expected in each course through proficiency tests: Objective Structured Clinical Evaluation, pioneering platform in Spain and launched by our professors.

Bachelor's Degree in Dentistry

Differential Ratios

Advanced technology

Train your skills and abilities in the medium and high fidelity dental simulation laboratories and in a pioneering virtual reality simulation classroom in Spain, to offer quality treatment in a safe and true-to-reality environment before working on the mouth of a real patient.

Practical work in basic subjects in the dissection room, biology laboratories, etc., and in rooms with three-dimensional anatomical models and augmented reality in order to know the organs on which to apply your treatments.

Unique installations

Acquire from the beginning the skills and abilities necessary for patient care in the Dental Consultations located in our Simulated Hospital (Madrid Campus), a safe and true-to-reality environment, where you learn to deal with multiple simulated clinical and even emergency situations,

learning to interact with other students in the area of health and to make correct decisions.

Prestigious faculty

All your professors are practicing professionals with demonstrable work, teaching and research experience in all areas of dentistry. They combine indepth training with approachability and motivation to help you achieve your best academic and professional performance and to familiarize you with the real professional world.

Interships in our own clinics

From the fourth year onwards, a large part of your training will be carried out in our University Dental Clinics. With 900 hours in which you will treat real patients, from diagnosis to comprehensive treatment, under the supervision of your professors. The clinics have more than 94,000 consultations and perform more than 160,000 treatments a year. There, you'll

learn about fully computerized systems and the latest dental and management trends and technologies.

At the end of your clinical training you will have carried out treatments in the different dental specialties including endodontics, prostheses and surgery.

A B2.2 level of Spanish is required to access to the internships. Universidad Europea provides students with support in Spanish learning.

^{*}All courses of all 5 years in the curriculum of UEM are delivered in English.

^{*}The courses of the first 3 years of the curriculum of UEV are taught in English and the last 2 years are taught in Spanish. Curricular courses may be subject to modification.

A B2.2 level of Spanish is required to access to the internships.

¹ Theory delivered in English, practice delivered in Spanish

Bachelor's Degree in Psychology

Differential Ratios

Unique installations

Solve cases and participate in simulated practical work with actors in rooms equipped with the most advanced technology, where you will be able to interact, see, give your opinion and completely follow-up on the cases raised. Even use innovative therapeutic tools such as virtual reality with which you can treat phobias or eating disorders, among others.

You will learn how to identify and manage a wide range of pathologies in our Psychosocial Care Center, authorized by the Autonomous Community of Madrid and in the Psychology Consultations located in our Simulated Hospital.

H Interprofesional education

You will share activities with colleagues from other areas of health: doctors, nurses, pharmacists, etc., to learn how to work in interdisciplinary teams, just like you will in the professional field.

Internships

More than 600 internship hours throughout the curriculum. From the third year onwards you will go to external centers and observe clinical practices with real patients in institutions and psychology centers such as the CUPIF Asociación con un pie fuera, Gabinete de Psicología Clínica Consulta Abierta, Gabinete de Psicología Clínica Con o Sin Diván, Down Madrid, Colegio de Psicoanálisis de Madrid, Gabinete de Psicología Clínica del Desarrollo (PSISE) and Proyecto Hombre.

Thanks to the high percentage of internship hours you will choose up to 4 rotations in different centers, and thus become familiar with a wide variety of options in the professional world.

At the end of the estudies, we will offer the two students with the best grades working contracts at the ANAR Foundation (Child and Adolescents at Risk Telephone Hotline).

Bachelor's Degree in Psychology

Differential Ratios

Work as a General Health Psychologist

Possibility of earning the University Master's Degree in General Health Psychology necessary to obtain the professional qualification as a General Health Psychologist in Spain.

Have an international experience

Complete your training at universities in different countries in Europe, America or Canada. Also, in line with our international projection, we offer two stays in a summer program at a European University, at the end of your studies.

Licence en Kinésithérapie

Installations uniques

Une grande partie des cours ont lieu dans des laboratoires de physiothérapie, de biologie, d'anatomie, de physiologie de l'exercice, de biomécanique, ainsi qu'en salle de dissection, en salle de civières ou dans notre Hôpital Simulé, qui possède des salles de consultation, des salles d'urgence, de soins intensifs, d'hospitalisation, des consultations de physiothérapie, etc. et les moyens technologiques les plus innovants : échographes, simulateurs haptiques, robots à réponse physiologique, etc.

🖖 Encouragement à la recherche

Vous pourrez participer aux projets menés à bien dans les groupes de recherche spécialisés en troubles musculo-squelettiques et contrôle moteur, ainsi qu'en Physical Therapy & Health Sciences.

En outre, l'Universidad Europea, en partenariat avec la fondation Dr Pedro Guillén, récompense les meilleurs travaux de recherche réalisés par les étudiants de fin de licence en Kinésithéraphie.

Label de qualité

Obtenez l'unique licence en Espagne certifiée par la World Confederation for Physical Therapy, institution qui représente les physiothérapeutes du monde entier. Ce label de qualité est la garantie que nous respectons les standards internationaux les plus exigeants en matière d'enseignement: corps enseignant, plan d'études, modèle académique, stages, centres cliniques, etc.

Selon le classement du quotidien El Mundo 2021, l'Universidad Europea est la 2e meilleure université d'Espagne et la 1ère parmi les universités privées dans le domaine de la physiothérapie.

Des raisons qui font la différence?

Licence en Kinésithérapie

Stages de haute qualité

Outre une formation théorique et plus de 700 heures de stages de simulation dont vous bénéficierez dès les premiers cours, vous bénéficierez également d'une formation clinique pratique de 1200 heures dès la deuxième année, avec des stages spéciaux consacrés au système neurologique et à l'appareil cardio-respiratoire. Vous réaliserez ces stages dans les plus de 50 établissements sanitaires avec lesquels nous avons passé des accords de collaboration, qu'il s'agisse d'hôpitaux publics ou privés de Madrid: Niño Jesús, Puerta de Hierro, Fundación Jiménez Díaz ou la clinique Cemtro.

Programme d'études novateur

Dans notre hôpital simulé, un environnement sûr et fidèle à la réalité, vous acquerrez les compétences et les connaissances nécessaires pour assister votre patient et vous apprendrez à interagir avec d'autres étudiants du domaine de la santé. Vous gagnerez ainsi en sécurité en vue de la prise de décision. Pour vous assurer que vous avez atteint les objectifs d'apprentissage, vous participerez à des examens d'évaluation de votre compétence: Évaluation clinique objective structurée.

Certains cours du programme peuvent être sujets à modifications. Toutes les matières du plan d'étude sont données 100% en français Il est nécessaire un niveau B2.2 en Espagnol pour prendre partie aux stages à la clinique en seconde année. La Universidad Europea offre un cours en Espagnol aux étudiants afin qu'ils puissent atteindre le niveau requis.

Health Science Foundation Year

The Health Science Foundation Year

This program is designed by the Universidad Europea de Madrid through which health can discover your true vocation and help you decide your future career as a dentist, pharmaceutical, biotechnologist, nurse, physical therapist, nutritionist or psychologist.

The objective of this program is to introduce you to the basic knowledge of the health sciences through key subjects such as Cell Biology and Genetics, Human Anatomy, Physiopathology and Biostatistics. Basic material for various Degree qualifications in health sciences corresponding to the structure, functioning and behavior of the human body, and methodologies for information analysis and scientific production.

You will also begin to develop **skills and abilities that are key** to your professional future in the health sector:
Psychology and Communication Skills, and Management
Skills and Group Management.

You will improve your level of English or Spanish with the language material depending on the group that you sign up for, and will also learn about health terminology.

You will be able to discover your true health vocation through the simulation module, as you will undertake an internship in a high fidelity simulation environment in facilities with advanced technology, which are pioneers in Spain. You will always be guided by a faculty of professors with extensive professional and educational experience. Some of the subjects in this program are eligible for recognition as part of the Degree program that you end up choosing to study.

Receive innovative training that will help you fully develop your professional competence to improve the life of people and society.

If you successfully complete the Health Science Foundation Year you might be eligible for ECTS credit recognition in the following programs of our Biohealth Department:

Health Science Foundation Year

Health Science Foundation Year Physiotherapy

Health Science Foundation Year de Physiotherapy est un programme conçu par l'Universidad Europea de Madrid pour vous permettre de découvrir votre véritable vocation et d'entrevoir votre future carrière de kinésithérapeute.

Ce programme a pour objectif de vous familiariser avec les connaissances élémentaires des sciences de la santé grâce à des matières clés comme la Biologie cellulaire et tissulaire, l'Anatomie humaine, la Physiologie et l'Histologie, qui sont des enseignements de base pour divers diplômes de licence en sciences de la santé ; ce programme vise aussi à vous familiariser avec le travail de kinésithérapeute, puisque le cours inclut l'introduction à l'approche des patients par le biais de techniques manuelles et instrumentales, ainsi que des exercices orientés vers la rééducation des blessures.

Ce programme vous permettra en outre d'améliorer votre niveau d'espagnol et d'apprendre le vocabulaire de la santé.

Encadré par une équipe enseignante largement expérimentée sur les plans professionnel et éducatif, en vue de vous permettre de découvrir votre véritable vocation sanitaire, vous effectuerez des stages dans un milieu de simulation clinique en suivant notre modèle universitaire d'apprentissage expérientiel.

L'Universidad Europea dispose d'un hôpital simulé, ainsi que de laboratoires équipés de la technologie la plus avancée, pionniers en Espagne, qui vous familiariseront au milieu réel d'un centre de santé, de manière sécurisée et contrôlée.

Recevez une formation innovante qui vous aidera à développer au maximum vos compétences professionnelles pour améliorer la vie des personnes et la société.

Si vous terminez avec succès la Health Science Foundation Year de Physiotherapy, vous pourrez faire une demande d'équivalence des crédits ECTS pour la licence en Kinésithérapie.

Global Bachelor's Degree in International Relations

The time is now, in many senses, anywhere

Do you want to study in an international environment, learn with bilingual professors, get to know the ins and outs of organizations and institutions, take classes at top universities all over the world, and have a competitive and global curriculum?

With the Global Bachelor's Degree in International Relations from Universidad Europea, a pioneer in this degree, you will accomplish all of this.

Taught entirely in English, you will learn to interact confidently in the international relations sector.

We're going to redesign the World. Want to join us?

What makes us different?

Global Bachelor's Degree in International Relations

London School of Economics & Political Science

Benefit from two international placements thanks to our mobility agreements with universities worldwide. In your third year, you will be able to study at prestigious universities in Europe, the Americas or Asia. In your fourth year, as a Global student in International Relations, you will study at exclusive and world-renounwed destinations such a the London School of Economics and Political Science.

Mandatory internship

You will undertake an internship in a public or private institution such as the Ministry of Foreign Affairs, a Spanish Embassy, a European Union Institution, a cooperation organization or an international foundation. You will have the chance to put into practice what you have learned and to strengthen skills such as teamwork, leadership or adaptability.

100 % international environment

Be international from the very first moment, inside and outside the classroom. Share learning experiences with students from other countries and with professors with extensive international experience that will bring you closer to the different professional dimensions in the international arena. Join the UEM's International Relations Club (IRClub), which brings together students interested in international relations and international affairs, from a social, professional and academic perspective. The IRClub carries out activities of all kinds that range from meetings with high-level personalities, organization of conferences and seminars, participation in MUNs in Spain and abroad, etc. Write and reflect on current affairs at the International Relations Observatory, our digital magazine dedicated to the analysis and research on international affairs. Students, professors and experts in International Relations come together in this university forum to discuss and inform on issues of global relevance.

Methodology: challenge based school

Experience our **Challenge Based Learning** methodology and learn how to professionally interact with the different agents that comprise the international context: states, public and private institutions, multinational companies, international organizations, NGOs, etc. Attend seminars with security and defense specialists, experts in global economics and Diplomats, and visit international organizations and strategic spaces for the understanding of International Relations. Acquire specific skills through courses like International Negotiation Workshop, International Cooperation Projects or Current Affairs Observatory.

Bachelor's Degree in International Relations

Differential Ratios

Professionals in the classroom

A high percentage of the faculty is comprised of professionals who are currently working in the field. Furthermore, prestigious professionals such as consuls and diplomats visit the classroom to discuss the reality of their day to day.

International stays

During the 3rd year, the student will have the opportunity to do international trip to Hochschule Trier, in Germany, or ESCE in Paris. In the 4th year, the student will have the opportunity to visit the Dublin School of Economics or Pace University of New York, also between the months of January and June. In the 2nd year, you can request other trips. There are hundreds of different university agreements available throughout the world.

Professional meeting spaces

Learning about international organizations with the "UN-Study Tour" to Geneva and the immersion program at the "Model United Nations". Have the opportunity to participate in numerous cooperation projects in developing countries, and active participation in the University Parliament or another international forum.

Practical methodology

The University encourages the use of real case studies during training in order to generate knowledge.

Bachelor's Degree in **Business Administration**

Differential Ratios

Learn BA a different way

Using a methodology that evolves as you learn, putting the focus on you. First you learn about the realities of business, attending talks, conferences, visits to companies and workshops. Then you work in virtual simulation environments and, after acquiring the knowledge and skills you need, you work on real projects for companies guided by a professor in our professional Consulting Lab.

Internationally recognized quality

Study the only Spanish BA (Business Administration) Bachelor's degree recognized with American accreditation from the ACBSP (Accreditation Council for Business Schools and Programs), which values excellence in training and the quality of the academic programs and professors.

With an innovative curriculum

Learn about the latest trends in business and enjoy a curriculum with innovative subjects such as a Business Workshop, Innovation Management, Sales Simulation and Marketing Workshop that favor internships in the business world. You will study in distinguished surroundings, with leading professional tools. Our finance classroom, the Financial Hub, offers Refinitiv technology to enable you to make business decisions based on real data from the companies.

With over 100 international destinations

Round out your studies with the right level of English to work both inside and beyond Spain in national and multinational companies. You can take part in any of over 100 international programs with premium stays

Bachelor's Degree in Business Administration

Differential Ratios

abroad: UC Riverside; UC Irvine; DBS. Dublin Business School; Canada-Vancouver Island University, and China-Hunan International Economics University, USA-Kent State University; USA-State University of New York at Oswego. Once you have completed your Bachelor's degree, you will have the language level the job market demands.

More than 400 hours of intership

You will complete required internships at leading businesses and organizations, such as Leroy Merlin, Repsol, KIA, KPMG, Manos Unidas, Bankinter, Campofrío, Accenture, etc., always under the supervision of an advisor in the company and an academic advisor. Both will provide follow-up on your progress and will evaluate your learning during that period.

Global Bachelor's Degree in International Business

Differential Ratios

100% International experience

You will complete two international placements that will be able to choose in your third year from more than 100 destinations thanks to the agreements we have with the best universities in Europe, North America and Asia. In your fourth year, as a student of the Degree in International Business, you will study in exclusive destinations for our Global students such as Heriot-Watt University (UK), McGill University (Canada) or UC Berkeley (USA) -three of the most prestigious universities in the world– and be able to complete your professional internship in these countries.

In a simulation environment

You will use simulators like Thomson Reuters' Eikon in class for analysis, research and financial simulation in the area of international business. In addition,

we will help you to prepare so that you can obtain certification for this tool commonly used in the financial market.

You will study in different environments and have access to the best tools used by professionals today. Our dedicated financial classroom, Financial Hub, puts Refinitiv technology at your disposal so you can make business decisions based on real business data.

With a curriculum designed as a global training program

You will study an ambitious program to become a global professional capable of holding a business position in any country and under any socio-economic environment. You will gain a work profile with a great capacity for management and leadership, an integral vision of the company and an international perspective.

Global Bachelor's Degree in International Business

Differential Ratios

And in touch with the professional world

You will be connected to a professional reality from day one: curriculum designed in collaboration with the company; faculty made up of practicing professors in banking, business or international trade; and compulsory internships that allow you to live and learn about the profession.

With a practical, challengebased methodology: challengebased school

With our methodology you will apply the knowledge you have learned to real cases or assumptions throughout your studies. You will use different laboratories such as the Consulting Lab or the International Relations Observatory and collaborate with students from other areas; just as you will in a company with colleagues from other departments.

Bachelor's Degree in Fundamentals of Architecture + Architecture Master's Degree

Differential Ratios

Create your projects

Learning in architecture has always been based on projects, here and all over the world. At Universidad Europea, we have updated this way of studying for the future, and that is why we have a new curriculum that includes more than 3600 hours of hands-on projects; these make up more than half of the credits for each academic year and give you 1000 more hours than other study plans.

Another thing that makes this curriculum innovative is that, besides offering workshops in Drawing, Projects, and Urban Planning, there are also workshops spanning all of the knowledge areas; this will allow you to work like a professional, integrating all of the fields at once and allowing you to merge all the possibilities into one single project from the first year onwards, incorporating new ideas as you progress through the degree.

Learn how people learn in the real world

Learn to use innovative technologies such as BIM methodology, digital manufacturing, and virtual reality, incorporating them naturally into your daily work. Sustainability, energy efficiency, and landscape techniques are also seen in a cross-cutting way, as part of the "big picture" of the project.

Start your international career

Universidad Europea de Madrid is the first university in Europe and second worldwide, including both public and private universities, to be awarded the two most prestigious international accreditations that internationally endorse the curriculum of our Architecture degree: NAAB (National Architectural Accrediting Board) of the United States of America; and RIBA (Royal Institute of British Architects) of the United Kingdom.

What makes us different?

Bachelor's Degree in Fundamentals of Architecture + Architecture Master's Degree

Since 2015, NAAB substantial equivalence allows you to join the professional market in the US at the same level as students who have studied for their degree there. American business people, companies and universities consider the curriculum taught at Universidad Europea to be of the highest level and highlight our international profile.

We have received RIBA accreditation for our Bachelor's Degree in the Fundamentals of Architecture and Master's in Architecture. This recognition by the Royal Institute of British Architects, the oldest and most prestigious architect association in the world, whose members include the majority of the most well-known professionals, makes Universidad Europea the only higher education institution in Spain to achieve this accreditation, and the seventh in Europe.

It certifies the quality of our architecture studies as being in the same league as that of universities such as Cambridge, the Architectural Association and the Bartlett School of Architecture.

It also recognizes our graduates in both the UK and the Commonwealth.

Thanks to these two accreditations, you can work almost anywhere in the world.

Bachelor's Degree in Aerospace Engineering

Differential Ratios

Create your projects

Participate in one of the student-run 34 Clubs, such as Air Division, designing and testing aircraft models in our wind tunnel, or the UE Formula Club, which is celebrating its eleventh anniversary by taking part in two international racing circuits each year.

You can also win prizes with the real projects you develop in class. Such as "Flying Dreams," which was a finalist in the Fly Your Ideas competition by Airbus, or S&R Solutions, winners of the PwC award in the Start UP Programme (a rescue drone project) or be like Adriana Alonso, a student in the bachelor's degree program and winner of the Mastercard Innovation Challenge (2018).

Complete your training

To reach the highest level as an engineer and sign off on projects, complete the Master's Degree in Aeronautical Engineering, and deepen and advance your career.

Professional prospects

Work in multidisciplinary teams with students from other areas: Computer Science, Design, and Engineering, among others. Empower your skills and abilities and train yourself to be a professional prepared for the market.

100% of our students find a job in less than 6 months after finishing their bachelor's degree in Aerospace Engineering.

Bachelor's Degree in Aerospace Engineering

Differential Ratios

Carry out an internship at the European Space Academy Center, European Space Agency, ITP, Iberia, Altran, Aernnova, or Airbus and complete a double degree from the University of Hertfordshire, UK.

Choose one of destinations to round out your profile such as Embry-Riddle in the United States, whose aerospace engineering program is ranked number one by US News & World Report.

Reinforce your learning

Participate in the PBS Awards for Integrating Projects by presenting your achievements to companies as important in the sector as AIRBUS in addition to more than 20 companies. The best projects will receive awards and you will have the chance to get a foot into the job market.

Some courses in the curriculum may be subject to modifications. All courses in the curriculum are delivered in English.

Bachelor's Degree in Industrial Systems Engineering (Specialty in Mechanics)

Ingenuity above all else

The engineering profession has lead the way in ingenuity, creativity and problem-solving skills, seeking efficiency since the first industrial revolution.

You can now join the FOURTH INDUSTRIAL REVOLUTION or Industry 4.0, which is currently booming and needs the best professionals to keep moving forward.

Universidad Europea offers the most complete courses adapted to today's market. You can study common engineering degrees, and you can also be better prepared than anyone else with a 4-year double specialisation.

What sets us apart?

Bachelor's Degree in Industrial Systems Engineering (Specialty in Mechanics)

New industry 4.0 laboratory facilities

Discover the new INDUSTRY 4.0 LABORATORY which we have designed with the latest technologies in sensor systems, automated systems, collaborative and industrial robots, cybersecurity, digital twins and the Internet of Things, among others. The experience of our professors and advice from leading companies in the sector will provide you with the latest technologies and ensure you make the most of your time at our University.

There is no better place to learn how to be a top-level professional.

Internships at companies

Put your knowledge to work with compulsory internships at companies such as Airbus, Altran, Siemens, Cepsa, Endesa, Indra, Repsol or a multitude of industrial SMEs.

The qualifications you need for the world of work

We are a Certification Centre for SolidWorks, a state-ofthe-art 3D software for the creation and simulation of all kinds of industrial processes. You will be able to obtain different diplomas depending on the level of difficulty.

Prepare for certifications in Cisco CCNA and Amazon Web Services Cloud Architecture. You will have access to the most widely used software in the industry to design, calculate and predict system behaviour: ANSYS, Autocad, CATIA, Matlab, MSC Software, National Instruments and SolidWorks, among others.

Have an international experience

Obtain a dual degree with the universities of Staffordshire, Hertfordshire or Wolverhampton (UK), and experience a period of study abroad in a leading country in the development of this area of engineering such as Canada, United States, Australia, Switzerland, Brazil, Denmark or United Arab Emirates.

Complete your education

You will earn an official degree in Industrial Systems - Mechanics specialty, a profession regulated by professional associations of graduates and technical engineers, thus enabling you to work anywhere around the world.

This Bachelor's Degree in Industrial Systems Engineering specialisation provides access to Universidad Europea's Master's Degree in Industrial Engineering, which qualifies you for the regulated profession of industrial engineering.

What kind of engineer do you want to be?

Bachelor's Degree in Industrial Systems Engineering (Specialty in Mechanics)

Formula UE Club

The leading Club in the School of Architecture, Engineering and Design. Engineering students come together to design, develop and build a formula car and to compete in domestic and international races. From the design of each prototype piece in the Fab Lab to actual testing in the workshop and at tracks.

Starting from the fundamentals of basic sciences (Physics, Chemistry, Mathematics), you will acquire mechanical knowledge of Industry (strenght of materials, design of machines, manufacturing) which will allow you to participate in the manufacturing of any product, from a simple spoon to the most complex and delicate systems you can think of.

You will do all this as part of a Bachelor's Degree that QUALIFIES you to exercise the profession of industrial technical engineer, with the support of Professional Associations of Technical Graduates and Engineers.

Plan your carrer from the start

Now that you are starting your university stage, you have your provision of a great academic offer from the beginning.

In addition, once the degree is finished, you have the Escuela Universitaria Real Madrid - Universidad Europea in which you can specialize in the world of sports through its prestigious postgraduate degrees in Management, Marketing, Law, Journalism and Communication, Physical activity and health.

Do you know the Plan AVANZA?

From the University we bet on our students and we are committed to supporting their growth and personal and professional development.

For this reason we launched the Plan AVANZA, a program specific study aid for Degree students from the Universidad Europea who want to continue your professional delvelopment advancing to the next level, pursuing a Master or Postgraduate with us.

You can get more information by consulting the web, with your Bachelor's advisor and on the phone: +34 917 407 272.

Financing and Scholarships

Finance your studies in a flexible way

Here at Universidad Europea, we are committed to ensuring the cost of a program is not an obstacle to access quality education.

We have a complete system of financial aid available to you:

Admissions Process

Documentation

To start the admissions process, reserve an appointment at: <u>universidadeuropea.com</u> or by calling **(+34) 917 407 272**.

After getting more information, you must submit the required documentation:

- Passport.
- Payment of the admissions fee on or before the day of your appointment.

What does the entrance examinvolve?

- Test to evaluate competencies and skills.
- Language assessment test.
- Motivational survey.

When will you know if you've been admitted?

You'll get the results of the entrance exam in an Admissions Letter that will be sent to you via email. If you have any questions, you can speak to our New Students Admissions Department: ads@universidadeuropea.es

Place Reservation

You are advised to reserve your place within 7 calendar days from receiving the admissions letter.

Enrollment

All students enrolling for the first time at Universidad Europea for a Bachelor's degree program must open a student file.

The Students Admissions Department will provide the candidate with all of the documents and forms they need to complete their enrollment.

As far as you want.
